

THE AI AUTOMATION BLUEPRINT

3 Workflows That Run Your Business on Autopilot

by Waseem Nasir • skynetjoe.com

The "AI Employee" Architecture

- ▶ **TRIGGER** → something happens (form, email, schedule)
- QUALIFY** → AI evaluates (good lead? important email?)
- ROUTE** → decision branch (qualified vs not)
- ACT** → take action (email, book, task, alert)
- LOG** → record everything (CRM, sheet, notification)

Workflow 1: Automated Lead Pipeline

NODE	TOOL	ACTION
Trigger	Webhook	Form submitted → instant fire
Parse	n8n Function	Extract name, email, budget, message
Qualify	OpenAI/Claude	AI scores lead 1-10 on fit, budget, urgency
Hot (7+)	Calendly + Email	Auto-book call + personalized email
Warm (4-6)	Email sequence	3 nurture emails over 7 days
Log	CRM	Create contact with AI analysis

★ **Results:** Response time 6hrs → 30s. Conversion up 127%. Zero manual work.

Workflow 2: Client Onboarding Autopilot

NODE	TOOL	ACTION
Trigger	Stripe webhook	Payment received
Create	Google Drive API	Client folder with template subfolders
Email	Email node	Branded welcome email + next steps
Project	Trello/Notion	Board with pre-built task templates

Calendar	Calendly	Kickoff call booking link
Notify	Slack/Telegram	"New client onboarded: [name]"

★ **Results:** 45 min → 0 min per client. Professional experience. Nothing missed.

Workflow 3: Invoice & Follow-Up

NODE	TOOL	ACTION
Trigger	Schedule/Manual	Milestone completed or billing date
Generate	n8n Function	Create invoice from template
Send	Email + Stripe	Invoice with payment link
Wait	Delay 3 days	Check if paid
Paid	Email + Slack	Thank-you + notification
Unpaid	Email	Polite reminder, escalate after 4 more days

ROI Calculator

TASK	HRS/WEEK	HOURLY RATE	MONTHLY COST
Manual lead follow-up	5	\$50	\$1,000
Client onboarding	3	\$50	\$600
Invoice management	2	\$50	\$400
Social media posting	5	\$30	\$600
TOTAL SAVED	15		\$2,600/mo
